

Year 3 Chemistry: Soil

Subject Specific Vocabulary		Layers of soil	Knowledge about soil
soil	The material on the surface of the ground.		<ul style="list-style-type: none">❑ Soils are made up of pieces of ground down rock which may be mixed with plant and animal material (organic matter).❑ The type of rock, size of rock pieces and the amount of organic matter affect the property of the soil.❑ Some soils are more permeable than others. This means that some soils allow more water to pass through it. 
organic matter	Material that has come from a recently living thing (plant or animal).		
weathering	The process of being worn away.		
texture	How an object feels and looks.		
particle	A very small piece.		
permeable	Allowing liquid or gas to pass through it.
